

Certified Scrum Master

With John Miller, Certified Scrum Trainer

OVERVIEW

Transcend the test and learn what real agility and great Scrum are. Hear real-life examples, lots of templates you can use, and more importantly, the principles of Agile and Scrum so you can adapt them to your context. The class will not make you a Master of Scrum, but, it will give you a strong start on your journey.

PreWork

1. If you want a brief background on Scrum, please watch these videos [Scrum Alliance E-learning - Scrum Foundations](#)
2. We will be reading these are articles in class located in this [folder](#).
3. If you have not already, give the [Scrum Guide](#) a quick read.
4. If you want your certification to be tied to another email address than your ServiceNow account, update this [Google Sheet](#) with the email you want to use

MIRO

We will be using Miro throughout the class.

Please find **YOUR NAME** on the sticky note and move it to under **ATTENDING** on the board.

You do not need an account, accessing it as **Guest** will be fine. Skip the signup and tutorials.

Miro works best with **Google Chrome**.

https://miro.com/app/board/o9J_l6jB9pc=

BREAKS

We will take a 7-10 minute break every hour-ish.

By default, lunch is scheduled for 12:30-1:30. Timezone is based on the class timezone.

PARTICIPATION

Active participation is required for certification. Make sure not to schedule any meetings during class. If this is unavoidable, let me know the time, I can try to schedule a break around that time

(no promises, but will try!). If you miss more than 30 m minutes of the learning, I am not allowed to submit you for certification in accordance to Scrum Alliance policies.

CSM LEARNING OBJECTIVES

1. Class Setup (and more...there is some learning here!)
2. What is Agile and why does it matter (it REALLY matters)?
3. What is Scrum and what is its origin story?
4. Who is the Scrum Team?
5. What is a Scrum Master? What does she do?
6. Create Your Product Goal/Vision. We will be building on a real product to learn Scrum.
7. Agile Requirements - The Product Backlog and Refinement
8. Do Sprint Planning
9. Do the Daily Scrum
10. Definition of Done - How to build quality in!
11. Do a Sprint Review
12. Sprint Retrospective and Access to Awesome Tools
13. The CSM Test and Certification Information
14. Class Retrospective

CONNECT

Feel free to connect with me on [Linkedin](#) and check out the recommendations section to see how others have rated my classes if it helps.

Get some rest tonight!

Thank You,

John Miller, CST
